

Converts your conservatory into a room for all seasons

- The EYG Hybrid Roof System gives an incredible U-value of 0.18. This meets building regulations when fully insulated and plastered.
- Hybrid roofs do not usually need planning permission - and can be carried out under 'permitted development' rights.
- If planning is required, we remove the hassle by securing permission on your behalf – making sure your project is 100% compliant.
- The roof has a choice of external finishes, modern plain ridge or traditional finial.
- Large glazed sections are available to allow in maximum light.
- Can be retro-fitted on to an existing conservatory.
- To compliment your Hybrid Roof System, we can install LED low energy lighting (ridge only).

- ✓ Brand new roof concept with glass and aluminium panels alternating (does not apply to valley section of roof).
- ✓ Thermal efficiency performance is better than a standard cavity wall.
- ✓ Creates a room for all seasons, useable living space all year round.
- ✓ Warm and cosy in winter, pleasantly cool in summer.
- ✓ Thermally efficient, proven to reduce energy bills.
- ✓ Internal plastered finish.

Roof construction through insulated elements = 0.18W/m2k. Glazing U-Value 1.2

The modern, practical, roofing system from EYG

Converts your conservatory into a room for all seasons

EYG Hybrid

insulated roof system

EYG's Hybrid roof combines a solid vaulted roof with glass panels offering a warm and thermally-insulated roof which lets in the light. Ensuring your conservatory will be useable all year round, warm and cosy in the winter, and pleasantly cool in the summer months. The benefits of solid and glass roofs are seamlessly merged, giving you the enormous benefits of creating a beautiful light-filled room which holds its temperature.

- **Add value to your home.**

Create a stylish new living space that will increase your property's value and saleability.

- **Bring your conservatory back to life.**

Turn your tired conservatory into a space which can be used and enjoyed all year round.

- **Installed within days.**

Because it is made to measure, it can be erected in no time and is guaranteed to be a perfect fit every time.
