A-RATED WINDOWS

Our windows are A-rated as standard, which means home owners have peace of mind that they're among the most energy efficient windows available in the UK.

All our windows are strong, robust and built to last. Every opening is fitted with a multi-point locking system and rigorously tested to comply with the **Secured By Design** standards for security – offering you the highest levels of protection.

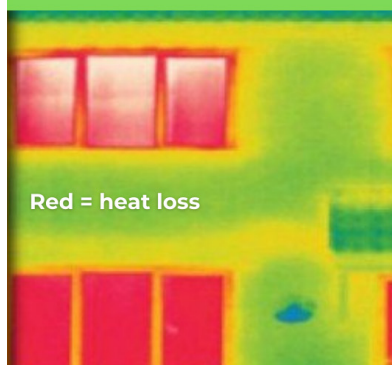

EYG's windows come in a wide range of styles and more than 200 RAL colours. Our A-rated windows carry Super Spacer technology, which when coupled with Low E glass can reduce heat loss by a staggering 94 per cent, as well as cutting CO2 emissions.

Installing double glazed windows will eliminate draughts and heat loss from your home which in turn reduces energy bills.

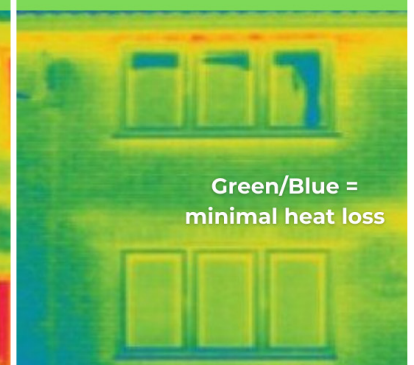

Having all new modernised windows also transforms the appearance of your home, adds value to your property, and makes it more appealing for house hunters if your property goes on the market.

Do you know how much heat loss from your windows & doors is costing you?

Before new uPVC Windows

After new uPVC Windows

GLASS

Low E glass is a durable high-performance glass that is considerably more neutral than traditional low-emissivity products, making it the best available.

EYG's Low E glass has a U value of 1.4 – which is better than many of our competitors and means it has a better thermal performance.

This means:

- Better insulation
- More comfortable rooms
- Less condensation
- Less tint in the glass
- More light
- Crystal clear glass with no 'haze'
- Environmentally-friendly

FUNDING OPTIONS

Established in 1971, EYG is one of the UK's leading home improvement and double glazing specialists. When you're about to make a sizeable investment, we understand the need to budget.

Thanks to our flexible payment plans, you can now improve your home immediately - without worrying how to pay for it!

Invest £1,000 to £50,000 on any products in our portfolio and there are three flexible ways to fund your dream project.

SECONDARY GLAZING

Secondary glazing is a separate internal window fitted inside the existing window which brings a host of benefits.

Customers use secondary glazing to improve heat retention in their home and to reduce noise from outside if they live close to a main road.

Well-fitted secondary glazing can even out-perform double glazing on noise reduction – reducing noise by over **50dB** in acoustic testing.

Listed buildings and properties in conservation areas are often subject to rigorous planning controls, and in most cases have existing single glazed windows which let noise permeate the home from outside, and perform poorly on security.

Heritage home owners opt for adding secondary glazing to improve the overall security of their windows, to improve energy efficiency, as well as giving them peace of mind.

 **MADE IN
BRITAIN**

Our secondary glazing has a slimline aluminium profile, and carries a five-year warranty.

FLUSH CASEMENT

Flush casement windows add a touch of traditional charm and character to any property.

Ideal for thatched cottages, timber-framed houses or homes built in the Edwardian and Victorian era, they combine the beauty of traditional timber casements with the modern qualities of double glazing.

SLIDING SASH

Sliding sash windows are carefully crafted to give your home the attractive appearance of traditional sashes, whilst being easy to use and highly energy efficient.

Perfectly suited to period homes, where retaining the traditional character of the property is essential, double glazed sash windows will give you years of trouble-free enjoyment.

TILT & TURN

Tilt and turn windows are a fantastically simple, stylish and contemporary solution which will suit either a modern or traditional property.

By giving homeowners the option to have their windows slightly vented or completely wide open - depending on the season and weather, controlling the temperature of a room has never been easier.

ALUMINIUM WINDOWS

Aluminium windows are strong, durable and a great way to make a style statement on a traditional or modern property.

Sleek, stylish and built to last, aluminium windows are always an eye-catching addition.

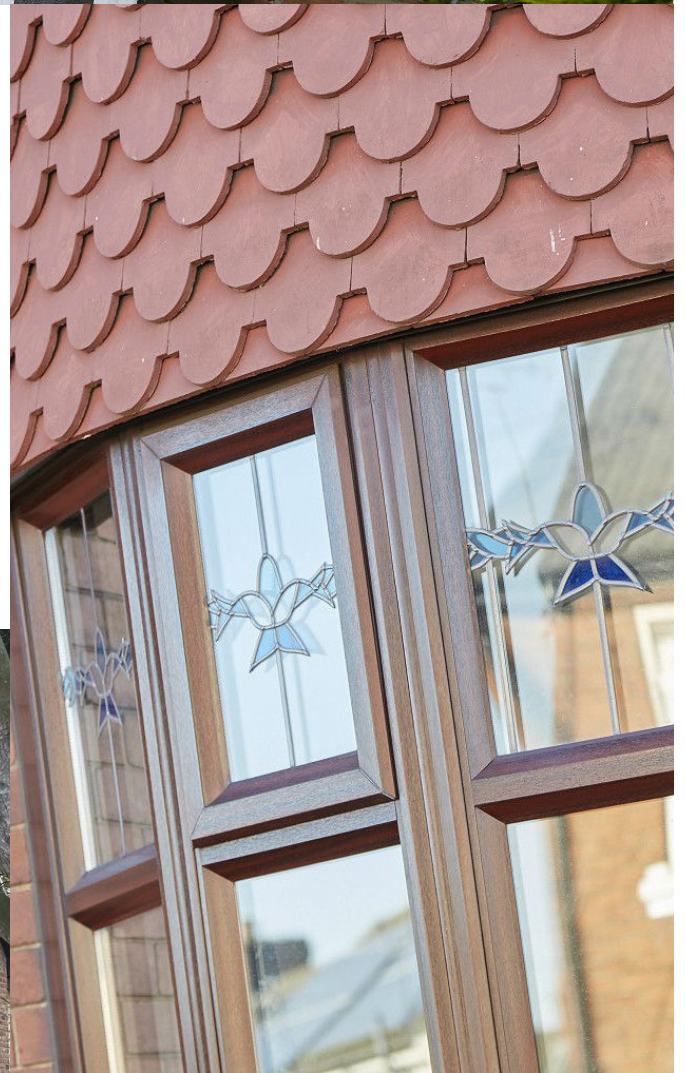

Versatile in function and design, they'll transform any modern or traditional home - flooding it with light without compromising on style.

BAY WINDOWS

Beautiful bay windows allow you to enjoy panoramic views and flood your home with natural light.

Traditional in appearance, a bay window acts as a focal point & creates the illusion of extra space.

uPVC WINDOWS

uPVC windows are perfect for almost any home because of their modern and stylish appearance.

Featuring the latest double glazing technology, uPVC windows now come with A-rated glass as standard.

For all available colours and finishes, refer to the end of this brochure.

BACKED BY EXPERIENCE

Checkatrade

“

Brilliant local team of Neil and Kai who together worked quickly, but with precision, to replace our windows. Removal of 100-year-old rotten frames undertaken swiftly and mess cleared up as they went. Took away rubbish where needed, and vacuumed up in all the rooms they worked in. They treated neighbouring properties with respect when working in their areas too. Really pleased with the craftsmanship and the end result, has done us proud.

Wendy Hook, **10/10**

“

We love our doors and windows! They really bring the house up to date too! We also noticed that the house is warmer. The team who carried out the work were outstanding - nothing was too much trouble and they made sure that we were happy with everything each step of the way. Can highly recommend.

Ann Page, **10/10**

“

Both Installers Pete and Andy conducted themselves professionally at all times, they always had time for my questions and worked to a high standard. They kept me informed throughout the process and left my property clean and tidy each day - thanks guys. Quality of product is clear to see and getting lots of compliments from neighbours. The difference internally is already being felt and I am not dreading the winter season now.

Anthony Redgrift, **10/10**

★ REVIEWS.io

“

We have just had all our windows replaced by EYG. Everything from the initial contact to fitting was so good. The quality of the windows is fantastic and makes such a difference to the quality of light in the house. The two window fitters Paul and Carl were brilliant, very friendly and professional. They worked efficiently and cleanly, nothing was too much trouble for them and they took time initially to explain what they were going to do, and also explained how the window mechanisms worked. We cannot recommend these two fitters highly enough and will definitely recommend the company to family and friends.

Christine Burton, **5/5**

“

Excellent service from start to finish. Installation centre went above and beyond. Expert fitters, all work carried out in a timely and caring manner. All the rooms left in an immaculate condition. Thanks to Kev B. Steve A and John G. Brilliant.

Angela Handa, **5/5**
